NextGen Healthcare and Massachusetts Health Information Hlway (Mass Hlway) Connect to Ensure Secure Exchange of Patient Information

Connectivity with Statewide Health Information Exchange to Improve Care Coordination for Patients across Massachusetts

HORSHAM, Pa.--(BUSINESS WIRE)-- [NextGen Healthcare Information Systems, LLC](#), a wholly owned subsidiary of [Quality Systems, Inc.](#) (NASDAQ: QSII) and a leading provider of healthcare information systems, services, and connectivity solutions, today announced it has successfully connected to the Mass Hlway, marking the opening of a new secure electronic communication channel for Massachusetts healthcare providers. This has created thousands of connections across hospitals and eligible professionals nationwide.

Through this partnership, providers utilizing [NextGen®-Share](#) can now exchange crucial patient information with the 350+ organizations connected to the Mass Hlway, the statewide health information exchange that facilitates the transmission of healthcare data and health information amongst providers, hospitals, and other healthcare entities throughout Massachusetts.

As a HISP solution, NextGen Share provides secure connectivity between both NextGen Healthcare and non-NextGen Healthcare providers. The solution fully supports interoperability across all certified Electronic Health Records (EHR) vendors to enable robust exchange of clinical information. It includes a searchable provider directory and message translation between supported formats. Providers can exchange clinical data files such as Consolidated-Clinical Document Architecture (C-CDA) files and attachments, referral request letters, intake notes, and more. Access to and sharing of this type of patient data will improve patient safety and patient health outcomes across the network.

"Collaborating and connecting with an interoperability leader like NextGen Healthcare, Mass Hlway participants will now be able to connect with many Community Health Centers and practices that use NextGen's EHR and HISP, resulting in better coordination of care for each patient and more comprehensive information for every physician," said Darrel Harmer, acting secretariat chief information officer at the Massachusetts' Executive Office of Health and Human Services. "The partnership with NextGen Healthcare exemplifies how use of the Mass Hlway can improve the speed and efficiency of care coordination for all Massachusetts' residents."

"The exchange of healthcare data promises to deliver far greater benefits than just the convenience of data mobility," explained Michael Lovett, executive vice president and general manager for NextGen Healthcare. "The Direct messaging connection between NextGen Healthcare and the Mass Hlway clearly demonstrates our commitment to enabling the uninhibited exchange of patient data and reaffirms our commitment to data fluidity. Through the deployment of NextGen Share, we are lowering the barriers to data interoperability, and the cost to do so, thereby creating the necessary communications channels to circumvent data blockers while complying with state and federal privacy laws."

About the Mass Hlway

The mission of the Mass Hlway is to deploy a secure electronic health information exchange that is accessible to all healthcare systems statewide, regardless of affiliation, location, or differences in technology; and to serve as a tool for the Commonwealth's healthcare community, improving coordination, quality, patient satisfaction, and public health reporting while containing costs. The Mass Hlway is operated by the Commonwealth of Massachusetts' Executive Office of Health and Human Services and overseen by a Health Information Technology Council and informed by consumer, provider, legal and policy, and technology advisory groups to promote a transparent, multi-stakeholder engagement model.

Certain statements in this news release are forward-looking statements within the meaning of the federal securities laws, including but not limited to statements made by Michael Lovett related to the Company's future products and offerings, the regulatory compliance of such future products and offerings, and developments and trends in the healthcare industry. These statements are based on current expectations of future events. If underlying assumptions prove inaccurate or unknown risks or uncertainties materialize, actual results could vary materially from the Company's expectations and projections. Factors that could cause the anticipated results to differ from those described in the forward-looking statements include the possibility that products will not achieve or sustain market acceptance; the impact of incentive payments under The American Recovery and Reinvestment Act on sales and the ability of the Company to meet continued certification requirements; the development by competitors of new or superior technologies; the timing, cost and success or failure of new product and service introductions, development and product upgrade releases; undetected errors or bugs in our software; changing economic, political or regulatory influences in the healthcare industry; availability of third-party products and components; competitive pressures including product offerings, pricing and promotional activities; the Company's ability or inability to attract and retain qualified personnel; possible regulation of the Company's software by the U.S. Food and Drug Administration; and general economic conditions. Additional risks and uncertainties are set forth in the Company's public filings with the U.S. Securities and Exchange Commission, including the discussion under the heading "Risk Factors" in the Company's most recent Annual Report on Form 10-K and any subsequent Quarterly Reports on Form 10-Q. The Company expressly disclaims any intent or obligation to update these forward-looking statements except as required by law.
