NextGen Healthcare Annual User Group Meeting Celebrates New Era and Embraces Change

New Leadership, Improved User Experience and Solutions Geared toward Value-based Care and Reimbursement

LAS VEGAS--(BUSINESS WIRE)-- [NextGen Healthcare Information Systems, LLC.](#), a wholly owned subsidiary of [Quality Systems, Inc.](#) (NASDAQ: QSII) and a leading provider of healthcare information systems and connectivity solutions, today kicked off its annual User Group Meeting (NextGen™ ONE UGM) at the Mandalay Bay Resort in Las Vegas.

To launch the conference, QSI/NextGen Healthcare's new President and Chief Executive Officer Rusty Frantz will address attendees in a general session that marks the beginning of a new era for the Company under his leadership. Frantz, who assumed his leadership role July 1, 2015, will address ways in which the Company is dedicated to improving every aspect of the user experience - from product performance, usability and scalability to knowledge exchange and client support. This underscores the Company's commitment to the long-term success of its clients as they transition to value-based care and reimbursement.

"As the new CEO of QSI/NextGen Healthcare, my highest priority is to evaluate the experience we offer our clients in the ambulatory arena, where our greatest strengths lie," said Rusty Frantz, president and chief executive officer for QSI NextGen Healthcare. "NextGen ONE UGM provides a great opportunity to present our strategic vision for the Company as we focus greater on our large, installed ambulatory client base."

"Having one of the largest installed user bases in the healthcare information technology space allows us to make a significant impact on our clients' abilities to successfully navigate and influence changing healthcare models," Frantz explained. "We want to provide them with the necessary solutions to stay relevant and thrive amid this evolving healthcare market as they move from fee-for-service toward value-based reimbursement. We also look forward to sharing the news of our recent agreement to acquire HealthFusion, and their cloud-based MediTouch platform."

Keynote speaker Billy Beane, general manager of the Oakland Athletics baseball team whose story is told in the book and film, "*Moneyball*," joins an impressive list of presenters covering several top-of-mind industry topics, including enhanced product usability and physician satisfaction; managed cloud services; cost containment, accountability and risk-sharing; population health management solutions and value-based financial management services.

With thousands of clients attending this User Group meeting each year, NextGen™ ONE UGM provides a distinct forum for those using the broad portfolio of NextGen® products and services. The meeting affords users a shared platform to discuss and learn about industry developments, product enhancements and emerging trends that improve healthcare delivery while reducing costs.

Throughout the three days of NextGen™ ONE UGM, leaders, product experts and clients will share best practices, receive hands-on product training and participate in more than 250 educational sessions. Physicians and nurses will have opportunities to earn continuing medical education (CME) credits or Continuing Nursing Education (CNE) Credits during 65+ CME-approved sessions.

Attendees and the public can join the NextGen ONE UGM conversation on [Twitter](#) ([@NextGen](#)), [Facebook](#) and Instagram, using the hashtag #ONEUGM15.

Certain statements in this news release are forward-looking statements within the meaning of the federal securities laws, including but not limited to those statements related to the Company's future products and offerings, the future use of the Company's products and statements made by Rusty Frantz related to the Company's agreement to acquire HealthFusion, future products and offerings, developments, initiatives, and trends in the healthcare industry. These statements are based on

current expectations of future events. If underlying assumptions prove inaccurate or unknown risks or uncertainties materialize, actual results could vary materially from the Company's expectations and projections. Factors that could cause the anticipated results to differ from those described in the forward-looking statements include the possibility that products will not achieve or sustain market acceptance; the impact of incentive payments under The American Recovery and Reinvestment Act on sales and the ability of the Company to meet continued certification requirements; the development by competitors of new or superior technologies; the timing, cost and success or failure of new product and service introductions, development and product upgrade releases; undetected errors or bugs in our software; changing economic, political or regulatory influences in the healthcare industry; availability of third-party products and components; competitive pressures including product offerings, pricing and promotional activities; the Company's ability or inability to attract and retain qualified personnel; possible regulation of the Company's software by the U.S. Food and Drug Administration; and general economic conditions. Additional risks and uncertainties are set forth in the Company's public filings with the U.S. Securities and Exchange Commission, including the discussion under the heading "Risk Factors" in the Company's most recent Annual Report on Form 10-K and any subsequent Quarterly Reports on Form 10-Q. The Company expressly disclaims any intent or obligation to update these forward-looking statements except as required by law.
